

PROJECT PHASE - 3 (Data And Applications)

Team Number :- 4

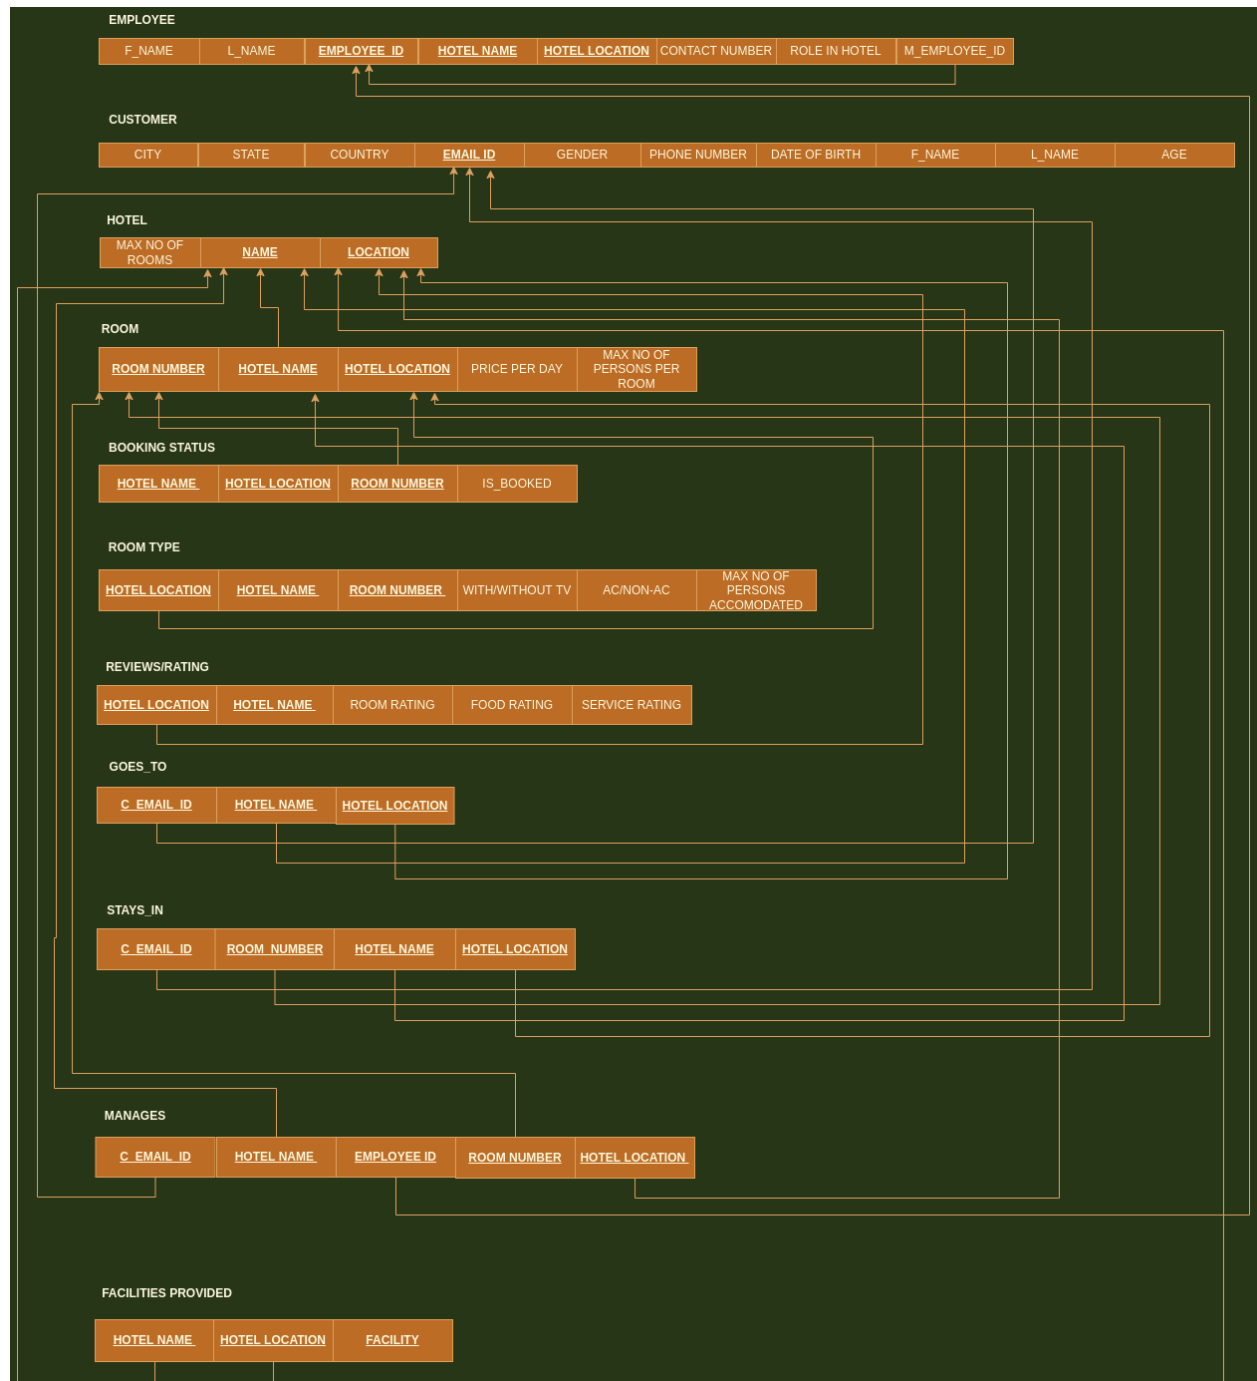

Team Members :-

- 1. Malla Sailesh (2021101106)**
- 2. Naga Manohar(2021101128)**
- 3. Naveen Chekkapalli (2021101025)**

Step 1 :- Mapping ER to Relational Model

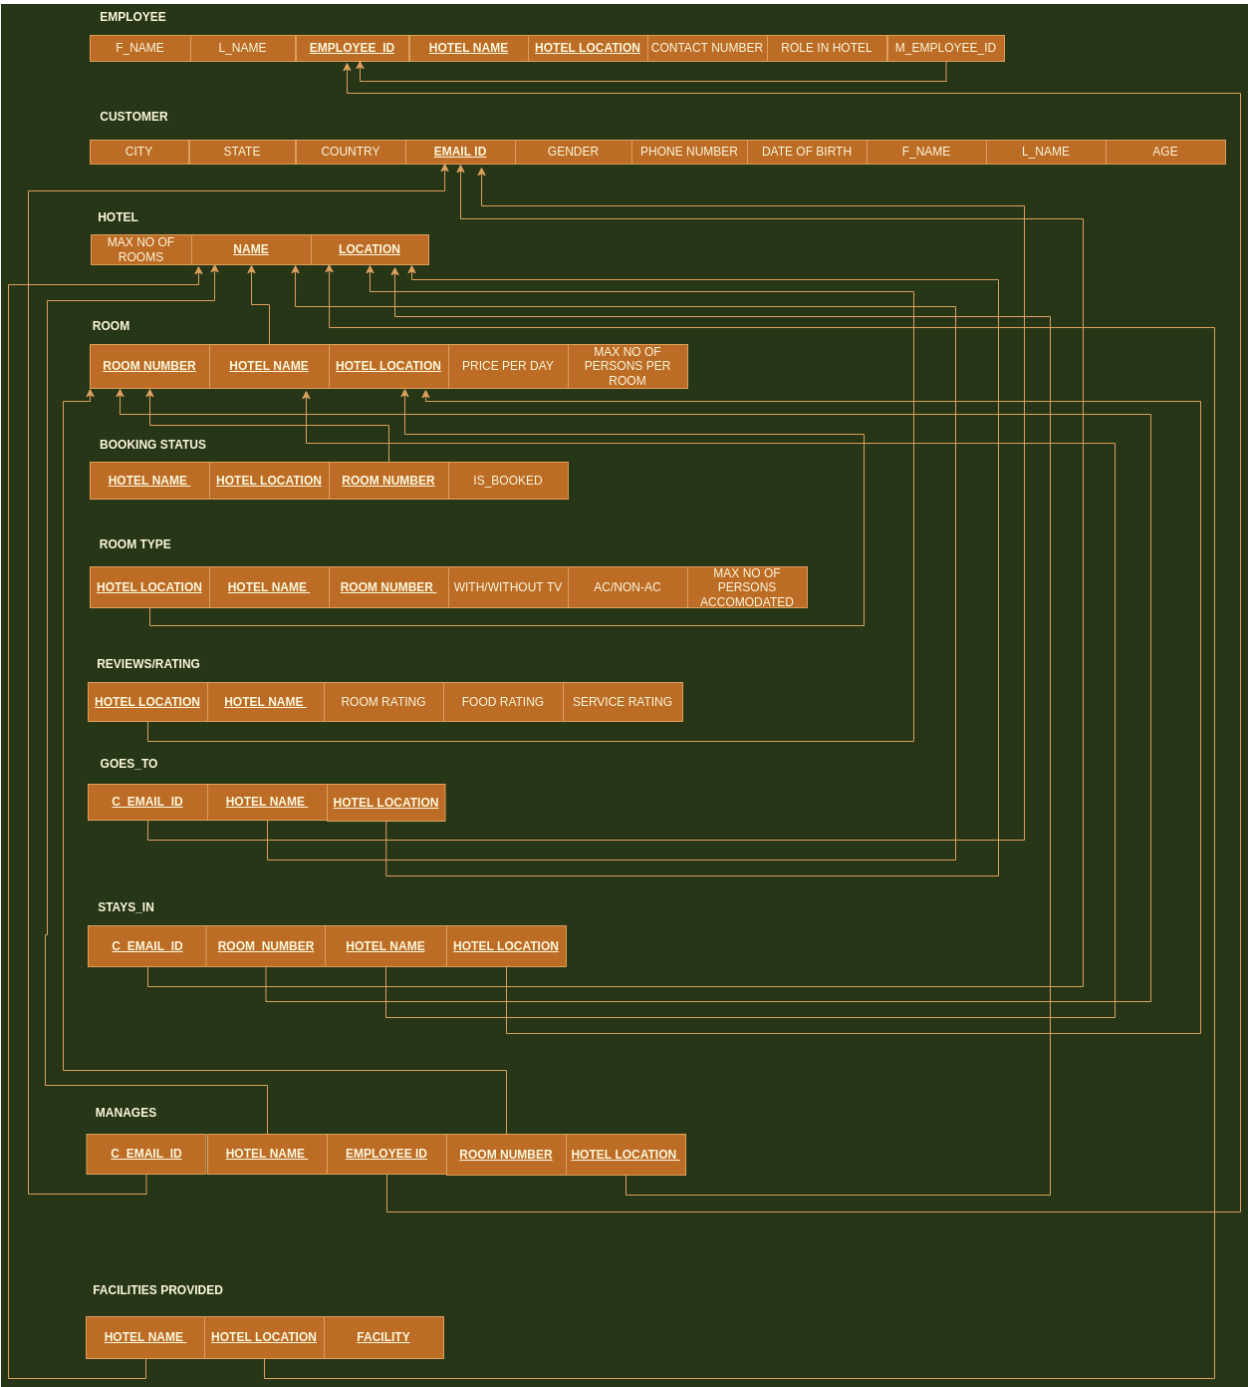

Note :-

In Book , for ER Diagram to Relational Model it was mentioned that multivalued_attributes should be kept as separate relation . This was only to be done in 1NF also . So the below diagram is after conversion from ER to Relational Model and after conversion to 1NF .

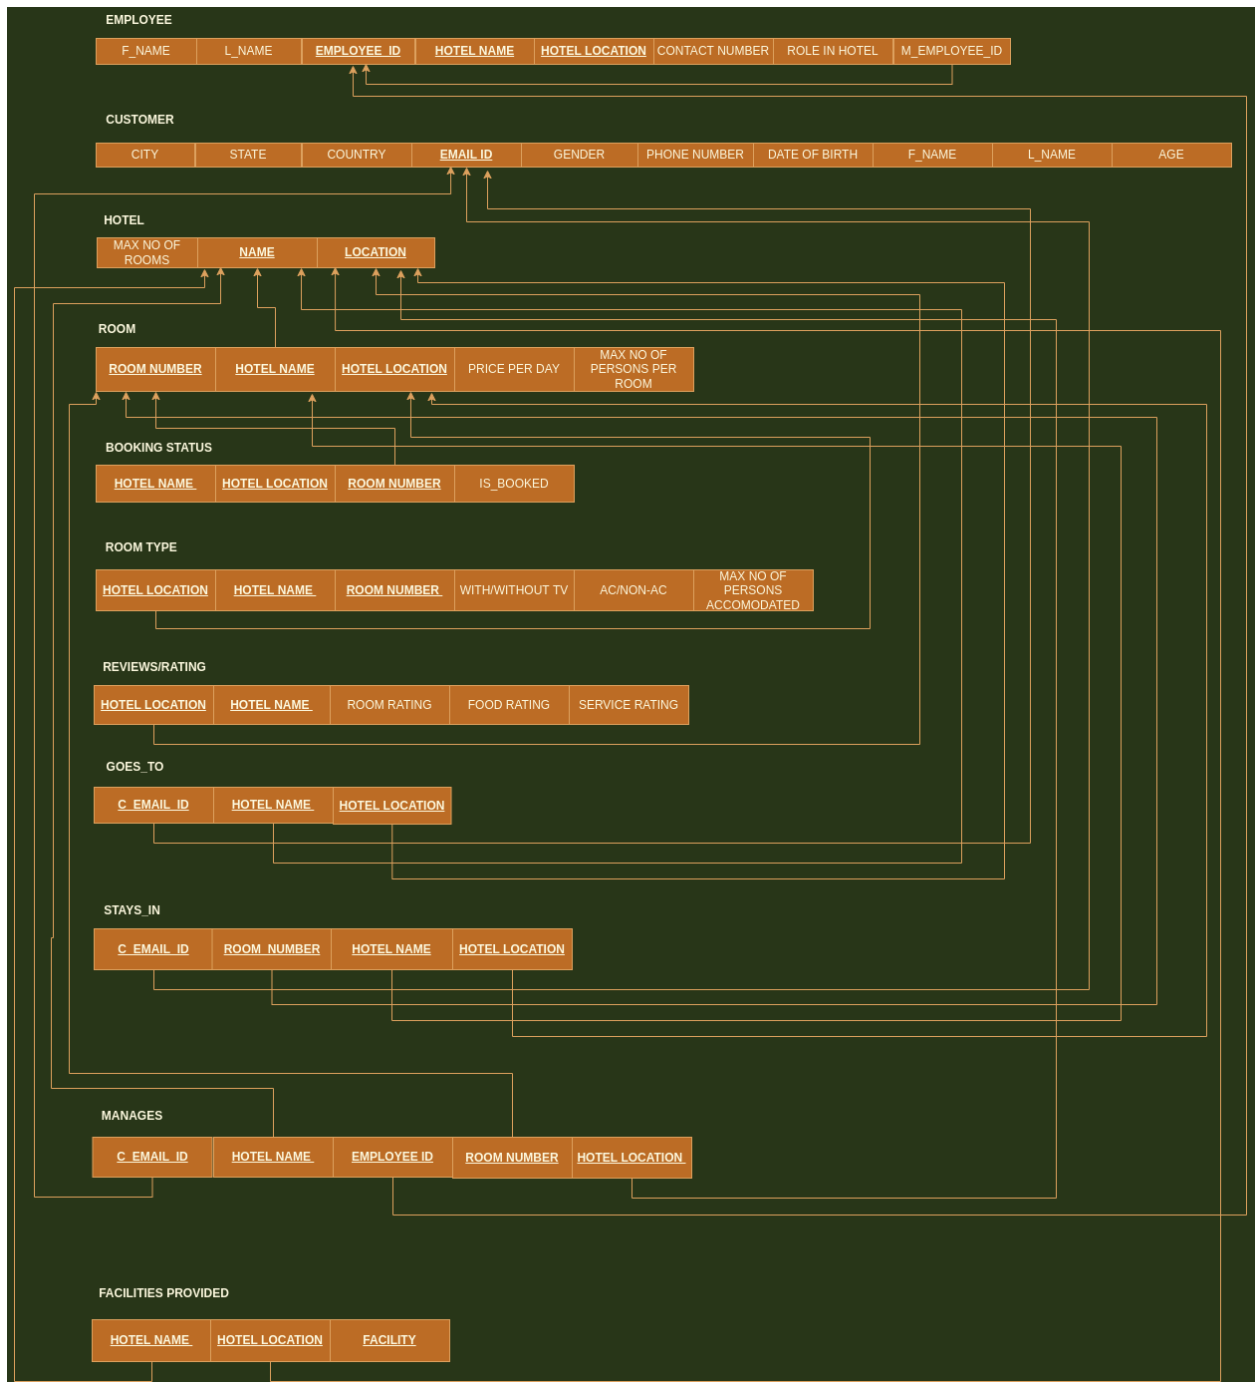

Step 2 :- Relational Model after conversion to 1NF

- From the above note there is no change in relational model to 1NF diagram . so the below diagram is same as the above .

Step 3 :- Relational Model after conversion to 2NF

Step 4 :- Relational Model after conversion to 3NF
