

Introduction to Software Systems

Lab Activity April 5

Question 1

Starting from the current directory, add extension **.try** to all the files in the current directory, as well as all the child directories and so on. Make sure you DO NOT rename the script file itself.

If some file already has an extension, still add **.try** to that, e.g., a file named **a.txt** will be converted to **a.txt.try**

Question 2

Print all Fibonacci numbers that are strictly less than 100. Make sure each number is in a new line, and they are in increasing order. Assume the first 2 numbers of the Fibonacci series as 1.
